## DETAILED ACTION

### *Election/Restrictions*

1. Claims 15-18 remain withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Election was made **without** traverse in Paper No. 6, received 23 April 2001.

### *Oath/Declaration*

2. The following is a quotation of the appropriate paragraph of 37 CFR 1.67(b) that form the basis for the objection under this section made in this Office action:

A supplemental oath or declaration meeting the requirements of § 1.63 must be filed when a claim is presented for matter originally shown or described but not substantially embraced in the statement of invention or claims originally presented or when an oath or declaration submitted in accordance with § 1.53(f) after the filing of the specification and any required drawings specifically and improperly refers to an amendment which includes new matter. No new matter may be introduced into a nonprovisional application after its filing date even if a supplemental oath or declaration is filed. In proper situations, the oath or declaration here required may be made on information and belief by an applicant other than the inventor.

3. As a result of amendment(s) to the claim(s), the pending claims no longer substantially embrace the invention as set forth in the statement of the invention and/or in the original claims. Accordingly, applicant is required to file a supplemental oath or declaration in response to this Office action.

### *Drawings*

4. New corrected drawings are required in this application because of reasons indicated on the attached PTO-948. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new

Art Unit: 1634

drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

### ***Specification***

5. The use of the trademark TRITON X-100 has been noted in this application. While the response of 30 December 2002 has resulted in the capitalization of said trademark, the specification needs to be amended so to clearly state the generic terminology of the product so represented by the trademark.

6. Although the use of trademarks is permissible in patent applications, the proprietary nature of the marks should be respected and every effort made to prevent their use in any manner that might adversely affect their validity as trademarks.

### ***Allowable Subject Matter***

7. Claims 23-31 are allowed.

8. As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).

Art Unit: 1634
